## Detailed Action

This action is in response to the application filed on 12/21/01.

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

Invention A: Claims 1-12 is directed to a system for bill payment

Invention B: Claims 13-24 is directed to a system for bill payment with third party printing

Invention C: Claims 25-40 is directed to a system for money transfer

Invention D: Claims 41-56 is directed to a method for transferring money

Invention E: Claims 57-62 is directed to apparatus with unique bar code

Invention F: Claims 65 & 73 is directed to a method for operating a renewable power predication market

Invention G: Claims 66 & 74 is directed to a system for transferring funds

Invention H: Claims 67 & 71 & 75 is directed to a system for financial transaction

Invention I: Claims 68-69 & 72 & 76 is directed to a method for financial transactions

Invention J: Claims 63-64 is directed to a method for providing payment between payee and payer

Invention A-M are related as combination and subcombination. Inventions in the relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP 806.05(c)). In the instance

Art Unit: 3693

case, the combination as claimed does not require the particulars of the subcombination as claimed. Each combinations is described above where in no invention combination identified does not perform the other combinations invention.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
